EMAIL: clwzrk@santel.net

Your call or visit is welcome anytime.

For more information regarding the sale, give us or any member of our trusted marketing team a call.

Fellow Cattlemen,

Welcome to the 36th annual Wieczorek Limousin Production Sale. Thank you for your interest in our program and for giving us the opportunity to serve a portion of your seedstock needs. This is something that we consider a privilege and take very seriously.

Since the beginning, when dad put those first units of Dandy, Éclair, and Prince Pompadour semen into our commercial cows over 40 years ago we have been emphasizing the same selection criteria. Cattle must be moderately framed, easy fleshing, docile cattle that can handle the harsh extremes that South Dakota, is so often known for, all while raising a big calf and carrying another and doing it under range conditions. Heifers are expected to calve by their second birthday and every year after that or expect a one way ticket to town.

As you look through the catalog you will see complete performance data and EPDs for each lot. We've also added a percentile ranking and breed average chart (found on page 19) for your usage so you can comparatively analyze the bull(s) of your choice numerically across the entire breed. Furthermore, new this year, is we've elected to invest in genomic testing for all our sale bulls to further to increase the accuracy of the EPD's provided. Note, a more detailed explanation of GE EPD's can be found on page 15. Additional information that will be available sale day will be adjusted yearling weights, adjusted scrotal data and carcass ultrasound information.

At Wieczorek Limousin, our goal is to make your bull buying experience as stress free as possible. All bulls selling are unconditionally guaranteed for the first breeding season. This includes death, injury and dissatisfaction. We will also keep your purchase until April 15 and then arrange delivery up to 250 miles at absolutely no cost to you. If you live beyond 250 miles, we will work with you in locating a satisfactory central point. Wieczorek Limousin will also provide you the option of paying 1/2 down sale day with the balance due at delivery.

Feel free to stop by the ranch any time prior to the sale to view the bulls. If you have questions about the offering or need assistance with travel arrangements, just pick up the phone and give us a call; we would be happy to assist.

If for some reason you are unable to attend but, still need a bull we can help you with that also. We take the risk out of buying on order with our sight unseen satisfaction guarantee. Your order will be handled in a confidential and professional manner by us or our trusted marketing team. Our policy is, if you don't like the bull when you get him you don't own him. It's that simple. Again, we look forward to seeing you at the ranch on the 26th.

Sincerely,
The Wieczorek Family

Selling full possession & 2/3 semen interest.

Every year there seems to be one individual that sets the bar, well folks it's with confidence that we present to you WZRK Commando 8212C! He comes to you in a homozygous polled package and couples that with a super stout featured, heavy structured, massive made, deep sided, wide topped, muscular look. Numerically, he's among the breed's very finest ranking in the top 10% or better for weaning weight, yearling weight, milk, calving ease maternal, carcass weight and ribeye area! From a pedigree standpoint, he's out of the widely popular, \$42,000 A.I sire Wulf's Apostle and out of our never-miss, lead donor - 8012U, which has produced numerous sale toppers in our program. The bottom-line is, if you're looking for that purebred bull that combines phenotype, growth and pedigree in one package, there's little need to look further than Commando. Bid with confidence.

If you like purebred, red, homozygous polled, bulls that are heavy muscled, high growth and loaded with rib-eye area study this own son of the famed Wulf's Xtractor son and consider your search over! To take it one step further, on paper notice he ranks in the top 3% or better for weaning weight, yearling weight, milk, total maternal and rib-eye plus, he charts a user friendly 29 docility EPD. We think a lot of this performance oriented, stout featured, attractive patterned bull and encourage you to study him February 26.

Here's one that comes to us in a homozygous polled package and carries that traditional Limousin look that made the breed popular. Visually, this own son of the high profile A.I sire Wulf's Apostle is extra heavy muscled, wide topped and structurally correct. On paper, he excels ranking in the top 1% for weaning weight, top 4% for rib-eye area, top 5% for yearling growth and top 10% for milk. Make no mistake and be sure to have this outstanding individual on your short list February 26!

Maternal brother to 2015 high-selling bull, WZRK Bootstraps, sold to ROM'N Limousin, Arlington, SD.

Here's one that promises to catch your attention sale day! Country Proud is a level made, sound structured herd sire prospect that offers obvious growth and performance advantages which promise to translate into your calf crop the way you'd hope. Take note, numerically he posted more than 750 pounds of adjusted weaning. The combination of his phenotype and numbers project him to be the type of herd bull that produces heavy weight calves year in and year out.

Check out this sure fire crowd favorite sale day! Visually the terms, big footed, deep bodied, thick and rugged describe this lunger. On paper this purebred herd prospect posted more than 763 lbs of weaning weight and projects to sire heavy weight calves that'll mash the scales down. EPD-wise, he's very well balanced across the page. Note, he ranks in the top 5% for weaning and top 3% for both yeild grade and ribeye. The bottom-line is, if you have a set of cattle that you want to make thicker, stouter and heavier - we think he'll do it.

Turn your attention to this exceptionally well designed, homozygous polled son of the highly popular MAGS Y-Axis A.I. sire that appraised for \$48,000. Visually, Canyon Rim is big footed, smooth shouldered, wide topped and bold ribbed. On paper you can appreciate the numerical balance he offers ranking in the top 25% or higher for WW, YW, MK, SC, CW and RE.

Study this homozygous polled, athletic moving, great fronted, black hided son of the highly popular, A.I. sire Wulf's Apostle. Aside from his phenotypic advantages, on paper he combines a user friendly 86 pound birth weight and charts over 700 lbs of adjusted weaning weight. EPD-wise, he is highlighted by his calving ease maternal figure which is in the top 1% and his top 3% milk figure.

If you like good footed, great fronted, long bodied, deep sided cattle that are homozygous polled, then watch for this exceptional son of Xerox. Numerically, notice he excels in his calving ease, birth weight and rib-eye EPD's which all rank in the top 15% of the entire breed. Point blank, this herd sire prospect projects to sire slick headed, sound made calves with plenty of muscle.

Our Story

Faith ~ Family ~ Friends

Wieczorek Limousin is a fourth generation operation located in southeastern South Dakota. Our main headquarters is located on the original tract of land homesteaded in 1882 by ancestors who immigrated here from Germany. While the original sod house no longer exists, the values that the first generation instilled still do – Faith, Family, and work ethic.

We have utilized artificial insemination since 1968 to advance the quality of our cow herd. In 1972, we expanded our existing multi-breed herd with Limousin sires, such as Dandy, Éclair, and Prince Pompadour. The ease of calving coupled with the calf vigor and muscularity from those first matings sold us on the breed. From that point forward, we switched exclusively to Limousin on the entire herd and began to build the purebred herd that currently grazes our pastures.

Our inaugural bull sale was hosted in 1980. To that end, one of the things we are most proud of is to have several customers that bought bulls at that first sale that are still purchasing WZRK genetics today. Over the years, many of our loyal bull buyers have become life long friends, and that's something that makes us truly feel blessed. We take the people side of the business very seriously and never for granted, that's why making sure customers are satisfied has always been our number one goal.

36th Annual

You've truly blessed us for 36 terrific years.

We sincerely thank you all for your continued support of our *Family* program and attendance over the years! We understand our success is a direct reflection of our customers and for that we will always be appreciative.

ET Maternal Siblings

PEN 4

This page of bulls is truly a unique sale highlight! These five maternal and four full brothers are all from the heart of our progressive embryo transfer program. They all stem from the prolific WZRK Miss Nascar 8012U donor dam that has continued to produce at the highest level as evidence not only by these five exceptional individuals that carry a rare combination of phenotypic quality, elite EPD's and unmatched predictability but, also our Lot 1 sale feature. To take it one step further, we'd like to take this opportunity to introduce our lead herd sire Wulf's Apostle - he is the sire to many throughout this sale offering and also four in this particular pen. Apostle was the top selling herd bull in the 2014 Wulf sale where he was admired by many for his combination of structural integrity, body depth and muscularity. We think his progeny speak to both his quality and consistency. That said, we are excited to showcase these very first Apostle calves to sell at public auction for your appreciated appraisal.

Improving Selection through NALF Genomic-Enhanced EPDs (GE-EPDs)

Limousin breeders and their commercial customers benefit greatly from new breeding and selection tools. The North American Limousin Foundation (NALF) has launched genomic-enhanced EPDs (GE-EPDs) with the fall 2015 international cattle evaluation. This provides GE-EPDs for all Limousin and Lim-Flex® animals that have completed DNA testing for genomic profiles.

The information from the genomic data can be as informative as a bull's first calf crop or a cow's lifetime production record. Since the genomic data is incorporated directly into the EPDs, cattle producers will not have to learn how to interpret the new data.

For more information visit www.NALF.org or call 303-220-1693.

Major Benefits of GE EPDs

- Risk reduction through improved accuracies
- Value of time to assess breeding stock at a younger age
- Increased rate of genetic progress
- Getting data on economically important traits, which are expensive or difficult to measure
- Combination of pedigree information, individual performance data, and genomics into one easy to understand number

REFERENCE SIRE
ROMN TUFF ENUFF 103T

These two exceptional sons (lots 27 and 28) are by our lead calving ease herd bull, ROMN Tuff Enuff 103T. Note, he has instilled the very same calving ease advantage in these sons and it's with confidence we offer his sons to commercial cattlemen seeking low birth weight calves. Sale day as you walk through the docile Tuff Enuff Sons we think you'll appreciate their consistency - almost all of them are smooth shouldered, long bodied, level made and carry both birth weight and calving ease EPD's ranking in the top 10% of the breed or better.

Using Limousin & Lim-Flex® EPDs to Make Genetic Improvement

The North American Limousin Foundation (NALF) uses all available information to predict an animal's EPD. This information includes: individual performance, pedigree, progeny and grand progeny performance, and genomic information. All this information is combined into one, easy to use, number that helps producers make genetic improvement in their herd.

Since the spring of 2015, NALF joined 11 other U.S. and Canadian breed associations to form the largest international multi-breed cattle evaluation in the world through International Genetic Solutions (IGS). This allows growth and carcass EPDs for Limousin and Lim-Flex® (Limousin x Angus hybrid) animals to be directly compared with Red Angus, Simmental, Gelbvieh, Shorthorn, Maine Anjou, and Chianina animals (and all their hybrid animals). This makes selection decisions easier for commercial producers.

Listed below are the definitions for Limousin and Lim-Flex EPDs and the units in which they are published. For more information visit www.NALF.org or call 303-220-1693.

About The Bulls

At Wieczorek Limousin, we believe the way young bulls are grown and maintained prior to their first breeding season is crucial and has a direct impact on the future longevity of each individual. Care must be taken not to push the bulls too hard as this ultimately often leads to problems that could have otherwise been avoided. Our feeding program consists of a balanced ration of silage, ground alfalfaprairie hay mix, corn and supplement. From weaning to yearling, the bulls are fed to gain approximately three pounds per day. The majority of this time is spent on either a 46 or 48 megacal ration. Once yearling weights have been taken the bulls are backed down to a ration that will maintain a 2-pound per day gain. A strong mineral program is also essential to ensure proper growth and development. To achieve this we employ a mixture of free choice and force fed products. Our vaccination and herd health program consists of the following. Each bull has received two doses of 7-way, IBR-BVD-PI3-BRSV and Somnus, and a single dose of One Shot (pasteurella haemolytica), and Pinkeye Shield and been treated with dectomax pour on at least twice. For several years we have utilized diagnostic testing to help us monitor the health status of our herd. Every female in our herd that is over 30 months of age and every bull that is over 24 months of age is tested for johnes every year. Because of our dedication to ongoing testing and continued results of all animals testing negative, we have been certified as a level three johnes free herd. Additionally, all sale bulls have also been tested for Outgrowth BVD and Leukosis and have also tested negative. Yearling bulls are fully guaranteed to pass a breeding soundness examination prior to turnout; due to age, they have not yet been tested. If you take your bull early we would ask you to have the bull tested prior to turn out. If you leave your purchase with us, we will have him tested prior to delivery. We will also vaccinate him with IBR-BVD-PI3-BRSV and pour him with dectomax, (we believe strongly in spring deworming and all cows, calves, and bulls in our breeding program receive dectomax prior to grass. He will also be vaccinated to protect against pinkeye, anthrax, and hoof rot. It is our goal to eliminate as many potential problems as possible.

Terms & Conditions

IDENTIFICATION OF ANIMALS.

(1) Each animal sold will have a readable tattoo corresponding to its registration paper. (2) Seller agrees to check all tattoos for accuracy prior to the sale. The buyer has the responsibility for rechecking the tattoos after taking possession and reporting any discrepancies to the seller immediately. (3) All animals to be sold will be identified by their official registration number, their tattoo, and their registered name. If nicknames are used, they should be in addition to the other information. (4) The NALF board recommends that when any animal is sold, there is complete disclosure of any retained genetics in the form of pregnant recipients, frozen embryos, or frozen semen.

REGISTRATION CERTIFICATES.

(1) The seller of the animal will submit the original registration certificate with transfer information or an application for registration with transfer information on it so that a certificate can be produced by the Foundation and transferred to the new buyer. The seller must sign the back of the certificate on the application to authorize the transfer. (2) It is the responsibility of the seller to provide the North American Limousin Foundation with the buyer's complete name, address, and membership number (if available) so that we can complete the transfer. It is important that the membership number be given if the buyer is already a member of NALF. (3) It is the seller's responsibility to provide the certificate or application, and transfer information to the NALF within 60 days following the date of sale, and pay transfer and registration fees.

TERMS.

Terms of all sales are considered to be cash or 1/2 down and balance due on delivery unless credit arrangements have been made prior to the sale between the buyer and the seller.

LIABILITY.

Each animal will be at the buyer's risk as soon as sold, but will be cared for by the seller for a reasonable period of time. Every precaution will be taken for the welfare of the cattle sold. Wieczorek Limousin and South Dakota Horse Sale, Inc. will not be responsible for any accidents, but every effort will be made to provide for the safety and comfort of those attending the sale.

HEALTH.

(1) On all animals sold, health tests will be announced at the sale or printed in the sale catalog. It is understood that health papers reflect the condition of the animal at the time of the sale but carry no further guarantee as to the future health of the animal. (2) Buyers having special health requests or who wish to take cattle into states with specific and rigid health regulations should inquire specifically about the health tests required for entry into their state. (3) All females sold are considered to be calfhood vaccinated for Brucellosis unless they are otherwise stated in the catalog or announced from the block. It is suggested that verification of vaccination be written on the health certificate.

ANNOUNCEMENTS.

(1) Any change from the information that is printed in the catalog will be announced from the auction block. (2) All announcements made from the auction block take precedence over the printed catalog. (3) Cataloged lots not selling will be announced prior to the sale.

BREEDING GUARANTEE.

All bulls are unconditionally guaranteed for the first breeding season to handle a reasonable load, with the only exception being in the case of gross negligence or willful misconduct on the part of the purchaser. Any guarantee with respect to the ability to freeze semen shall be a separate agreement between buyer and seller.

OPTION & PRIVILEGE OF RETURN OR ADJUSTMENT.

(1) All claims for adjustments or refunds must be made in writing either within six months of the date of the sale or no later than six months after the animal reaches 18 months of age, whichever occurs last. (2) In the event that an animal is claimed to be a nonbreeder, that animal must be returned to the farm of the seller in good condition and must have met the health requirements of the original sell state. The seller shall be entitled to six months trial following the return of the animal in which to prove that the animal is a breeder. If at the end of six months, the seller has been unable to prove the animal as a breeder, the seller shall, at the option of the buyer, replace the animal with another of equal value or refund the total purchase price. The return of the purchase price shall in all cases be deemed as full settlement.

Any expense incurred in transporting the animal that is claimed to be a non-breeder shall be the responsibility of the purchaser, except that the seller shall be responsible for transportation costs in the excess of the distance between the purchaser's farm and the location of the sale. If the seller proves the animal to be a breeder, it shall be the obligation of the purchaser to take delivery of the animal and pay all expenses incurred for transportation. (3) It is the obligation of the buyer and seller to negotiate any settlements on cattle that have not been properly presented at a sale. The selling of an animal constitutes a contract between buyer and seller and is not the responsibility or the right of the North American Limousin Foundation or of the sale management firm to settle disagreements between buyers and sellers of cattle that have not been properly presented.

The return of an animal at the expense of the purchaser with a refund of the purchase price made by the seller is in all cases considered to be a complete settlement. Other settlements which are negotiated between buyer and seller may be equitable to cover instances in which cattle are not as represented sale day, but that does not warrant complete return of the animal.

BLOOD TYPING FOR PARENTAGE VERIFICATION.

All animals sold are guaranteed to be offspring of their recorded parents. Under the rules of NALF, all bulls born after January 1, 1991, that are to be used for artificial insemination or used naturally in a herd other than the owner of record must be parent verified by blood typing to both sire and dam. All females born after July 1, 1987, that are to be used for embryo transplant and all bulls born between July 1, 1987, and December 31, 1990, that are to be used for artificial insemination or used naturally in a herd other than the owner of record must be sire verified through blood samples available to purchasers upon written request by the purchasers so long as written request is received by sellers within 60 days after the date of sale of the applicable animal.

INSURANCE.

Anyone wishing to insure their purchases may do so by contacting the marketing team.
